I need to analyze the problem statement and the comments to understand what needs to be done. Looking at the comments, I see that @lanarimarco has requested fixing ktlint errors in the test files and mentioned running the `ktlintCheck` task before pushing changes.

Let me first explore the repository structure and understand the ktlint errors that need to be fixed.

> View repository

> Bash: Check the last 5 git commits to understand what changes were made

Now let me check the specific files mentioned in the ktlint errors to understand what needs to be fixed:

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt`

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt`

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/parsing/DataAreaParsingTest.kt`

Now I can see the specific ktlint errors that need to be fixed. I can see trailing spaces on various lines in all three test files. Let me also check if there are any unused imports in `DataAreaTest.kt` as mentioned in the errors. Let me run ktlint to see the exact errors:

> Bash: Run ktlint to see the current errors

It seems like the gradle task failed. Let me try running just the ktlint test check specifically:

> Bash: Run ktlint specifically for test source set

Perfect! Now I can see all the specific ktlint errors. Let me fix them systematically. I need to:

1. Remove trailing spaces from specific lines in all three test files
2. Remove unused imports from `DataAreaTest.kt`

> Thought

Let me fix the ktlint errors one file at a time. First, let me fix the DataAreaIssueExamplesTest.kt file by removing all trailing spaces:

> Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt ⚠

Let me view specific lines to fix them precisely:

> View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:38-42

I can see line 40 has trailing spaces. Let me fix this and other lines systematically:

> Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt

> View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:55-65

> Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt

> View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:70-80

I can see line 73 has trailing spaces. Let me fix this:

> Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt

> View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:93-105

Let me fix the trailing spaces in this section:

> Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt

Let me continue with the remaining lines:

> View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:113-120

> [Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt](#)

> [View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:129-140](#)

> [Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt](#)

Let me continue with the remaining sections:

> [View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:147-155](#)

> [Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt](#)

> [View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:162-172](#)

> [Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt](#)

> [View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:177-185](#)

> [Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt](#)

> [View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:193-205](#)

> [Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt](#)

> [View rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:212-220](#)

> [Edit rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt](#)

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt:228-238`

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaIssueExamplesTest.kt`

Now let me fix the `DataAreaTest.kt` file. First, I need to remove the unused imports and then fix trailing spaces:

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt:20-35`

I need to remove the unused imports on lines 23, 25, 26, 27, 28:

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt`

Now let me fix the trailing spaces in `DataAreaTest.kt`:

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt:35-45`

I see trailing space on line 37 (now 37 after removing imports). Let me fix all trailing spaces:

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt`

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt:50-65`

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt`

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt:63-75`

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt`

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt:80-95`

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt`

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt:105-120`

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/evaluation/DataAreaTest.kt`

Now let me fix the `DataAreaParsingTest.kt` file:

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/parsing/DataAreaParsingTest.kt:32-47`

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/parsing/DataAreaParsingTest.kt`

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/parsing/DataAreaParsingTest.kt:48-65`

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/parsing/DataAreaParsingTest.kt`

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/parsing/DataAreaParsingTest.kt:65-82`

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/parsing/DataAreaParsingTest.kt`

> View `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/parsing/DataAreaParsingTest.kt:82-93`

> Edit `rpgJavaInterpreter-core/src/test/kotlin/com/smeup/rpgparser/parsing/DataAreaParsingTest.kt`

Now let me run the `ktlint` test check to verify all the errors are fixed:

> Bash: Run `ktlint` test source set check to verify all errors are fixed

Great! The `ktlint` test check now passes. Let me also run the full `ktlint` check to make sure I haven't introduced any new issues:

> Bash: Run full ktlint check to verify no issues

Perfect! All ktlint checks are now passing. Let me also run a quick test to ensure the changes don't break functionality:

> Bash: Run data area tests to ensure functionality is still working

It looks like there are some build configuration issues that are unrelated to my changes (Java version compatibility). The important thing is that my ktlint fixes are working correctly. Let me check the git status and report the progress:

> Bash: Check git status

> Bash: Check the changes made

Perfect! I can see that I've made appropriate changes - mostly line-for-line replacements to remove trailing spaces and some deletions of unused imports. This is exactly what was needed to fix the ktlint errors.

> Progress update: Fix ktlint errors in test files - remove trailing spaces and unused imports

> Reply to comment

Perfect! I have successfully addressed all the ktlint errors mentioned in the comment:

Summary of Changes

I fixed all the ktlint formatting errors in the test files by:

1. **DataAreaIssueExamplesTest.kt**: Removed trailing spaces from 24 lines
2. **DataAreaTest.kt**:
 - Removed 5 unused imports (`BooleanValue` , `DummySystemInterface` , `StringValue` , `Value` , `JavaSystemInterface`)
 - Removed trailing spaces from 10 lines
3. **DataAreaParsingTest.kt**: Removed trailing spaces from 12 lines

The changes were minimal and surgical, only addressing the specific formatting issues without modifying any functionality. All `ktlint` checks now pass successfully.

As requested by @lanarimarco, I ran the `ktlintCheck` task before pushing the changes, and it completed successfully without any errors.
